

Dredging & Reclamation

Creation of Additional Land in the Greater Male' Region

Towards the policy of the Government on development of integrated urban centers and provide focused social and mid-range housing together with commercial, social and integrated spaces, there are plans to reclaim additional areas from Gulhifalhu.

Dredging & Reclamation

Creation of Additional Land in the Greater Male' Region

Towards the policy of the Government on development of integrated urban centers and provide focused social and mid-range housing together with commercial, social and integrated spaces, there are plans to reclaim additional areas from Gulhifalhu.

Scope:

- Dredging and reclamation of additional land of Gulhifalhu: Estimated 21 million cubic meter sand for 85 hectares of additional land.
- Shore Protection and Island Access Infrastructure for Gulhifalhu: Revetment, Harbours and supporting infrastructure is another essential component to provide safe access to and from development. Additionally, this infrastructure is required to provide safe conditions for maritime operations that are critical for the logistics of goods and other necessary provisions for the development of the population.

Development Model:

- The Government of Maldives is seeking to discuss the proposed project with established contractors with experience in the area.

We invite proposals and inquiries from interested parties who wish to explore this project.
