

Development of Digital Health Infrastructure

The Government of Maldives invites investors to participate in the development of a state-of-the-art Digital Health Infrastructure and Interoperable Electronic Medical Records (EMR) System, aimed at transforming the healthcare system through technological advancements, enhancing patient care, and ensuring seamless data exchange across medical institutions.

Development of Digital Health Infrastructure

Objectives:

- To build a robust digital health infrastructure that integrates all healthcare services across the Maldives.
- To implement an Interoperable Electronic Medical Records system, enabling seamless data sharing between healthcare institutions.
- To enhance the efficiency, accuracy, and quality of healthcare services delivered to citizens.
- To support the digitalization of healthcare management and ensure easy access to medical records for both patients and providers.

Scope:

- Develop a standardized, scalable, and interoperable Electronic Medical Record (EMR) system for nationwide implementation, ensuring data exchange across public and private health facilities with a focus on privacy and security.
- Enhance the existing telemedicine infrastructure by adopting digital health solutions for real-time information exchange in line with local needs.
- Establish e-learning platforms and in-service training programs to build a competent workforce skilled in digital health systems.
- Strengthen the digital health infrastructure by upgrading backup systems, expanding data center capacity, improving data security, and procuring necessary data entry devices.

Potential Incentives:

- Investment in the digital health sector aligns with national healthcare priorities, ensuring long-term governmental support and potential access to funding through government initiatives.
- Growing demand for telemedicine and digital health solutions, driven by population health needs, especially in remote islands, presents significant opportunities for investors.
- Position as leaders in the emerging digital health sector, contributing to vital national infrastructure and improving healthcare access across the country.

Envisaged Investment: Investors to propose.

Timeline: 2025-2027

Focal Agency: Ministry of Health

For Submissions:

- Investors to submit proposals to bureau@health.gov.mv and piir@health.gov.mv
