

# RasMale' Development – Reclamation and Shore Protection

The Government of Maldives invites investors to participate in the RasMale' Development Project, aiming to create a climate-resilient urban settlement that serves as a zero-carbon, safe island. This ambitious project focuses on sustainable development, housing solutions, and infrastructure, contributing to the Greater Male' Area's growth.

# RasMale' Development – Reclamation and Shore Protection

## Objectives:

- Develop RasMale' as a climate-resilient urban settlement with a zero-carbon safe island concept.
- Provide a lasting solution for housing issues in the Greater Male' Area.

## Scope:

- Reclamation of 1,153 hectares of land, elevated 3 meters above sea level.
- Shore protection with a focus on beach usage and accessibility.
- Development of a zero-carbon, sustainable urban area, with a focus on climate-proofing and livability.
- Construction of 65,000 housing units across various income levels (social housing, middle-income, and high-end).
- Development of infrastructure such as roads, parks, office buildings, education centers, sports and entertainment zones, hospitals, schools, and commercial areas.

**Potential Incentives:** Investors to propose

**Envisaged Investment:** Investors to propose

## Timeline:

- Commencement: Q3 2025
- Completion: Q3 2028

**Focal Agency:** Ministry of Construction, Housing and Infrastructure
